| Minot State University | two Public Elementary Schools               | I plan on becoming an elementary teacher.  |  |
| Minot State University | Public Schools                              | I plan on becoming an elementary teacher   |  |
| Minot State University | Edwin Loe Elementary School in New Town, ND | I plan on serving my community by teaching in the area, organizing bible studies, and organizing 5k runs and walks to raise money for charity.   |  |
| Minot State University | Rickard and Hagen Elementary                | I will volunteer for school functions and summer programs. I also help out my community by cleaning up ditches and street during the city clean-up week. I also volunteer to help out at our communities summer events.        | While I was working in the schools, I noticed how much of an impact another body can be in the classroom. There are many students that need more one-on-one time and I was able to give that to them while the other teacher taught the whole class.   |
| Minot State University | Berthold Public School                      | I feel like since my career will be in education, I would like to volunteer to help the environment, which is another passion of mine. I would like to see what my community needs, especially after the flood we experienced. | I have learned so much through my experience with students. I have been able to try new ways of teaching and to learn how to handle students in the area I plan to teach. I walked away with more confidence and skills to succeed. I think my students have taught me so much and I will miss them and my time with them. Looking back, this was a great experience in my life.   |
| Minot State University | Elementary schools                          | I plan on helping out in the schools whenever I can.   |  |
| Minot State University |   | I plan to volunteer my time and expertise to those under served populations that lack adequate healthcare in our country.  |  |
| Minot State University | Minot High School Magic City Campus         | I will be continuing my education to become a high school science teacher. This is a very high need teaching area and one that I am very passionate in.  |  |
| Minot State University | Minot Area Community Foundation             | I plan on volunteering with low income families in any way that I can. This will also include helping military and veterans families.  | Part of that time that I worked with the foundation, we were headquartered in the basement 'bomb shelter' of a bank. There were no windows and from what I could tell, only an elevator in or out. I worked late one Friday evening and by the time I realized that it was late enough to be dark outside, everyone else had left, including the bank employees. The doors to the bank only lock and unlock with a key after hours, which I did not have in my possession. So, I had to call the non-emergency police dispatch phone number to have them call to have someone come and let me out of the bank.<br><br>It gets better, the gal that the dispatcher called to let me out, was still at the bank, on the other side of the building and beyond another locked door.<br><br>Wait, it gets even better, apparently there was a back door, up a set of steps that I had never seen or been shown because we so busy...<br><br>Needless to say, everyone had a huge laugh over that experience! |

| Minot State University | Berthold Public School<br>Erik Ramstad Middle School   | I plan on serving my community in the area of education and teaching the future citizens of our country.  |  |
| Minot State University | Trinity Homes, Trinity Hospital                        | I plan to continue my career in my home-town in the field of nursing. I would like to start at a hospital to gain experience, and then hopefully move to more of an educational position in the public health area. | Through my experiences with the Compact Service Corps program I gained confidence in my leadership skills, and was able to act on the needs of the community.  |
| Minot State University | Trinity Hospital                                       | I plan on working as a nurse  |  |
| Minot State University | Trinity Health (Minot)<br>Minot Public Schools<br>MAFB | I plan to stay and work here in Minot which is a rural community which is in dire need of nurses. I would like to volunteer help rebuild Minot from flood.  | One of the most rewarding experience I had is during patient teaching, when patient says 'I did not know that' even on basic information about their illness...I feel like I made a difference by imparting knowledge important to their healthcare. |
| Minot State University | North Central Human Service Center<br>Trinity Hospital | I hope to continue to see the needs in the community and assist with those needs. I plan to volunteer with different fundraisers for healthcare awareness and plan to participate in Campus Compact again.          | This taught me how much not only we benefit ourselves with our time spent with patients for our schooling, but also how much it addressed the need at the hospital for patient care and the shortage of nurses.                                      |
