

## Sharing the Livescan Machines

In an effort to save on shipping costs, we are asking that Coordinators communicate with each other to try to schedule the machine together. For example, if Naropa University needs the machine for two days and University of Colorado Boulder needs the machine for two days, we would like to schedule the machine to be in Boulder for four days consecutively.

In addition, if your Members miss their scheduled date/time for fingerprinting, we are hoping they can go to another campus in their area.

If you do not see your campus listed, it is because there is not another participating Compact Service Corps Program in your area.
